01 Bibliographies

86-001 013
Gesellsch.f.Information u.Dokumentation (GID): Thesaurus Guide Analytical directory of selected vocabularies for information retrieval, 1985. Amsterdam: North-Holland; Luxembourg: Office For Official Publications of the European Communities 1985. XXXVI, 748p. ISBN 0 444-87736-3 (N.-H.); 92-825-4897-X (EC)
This project of the European Communities was carried out by a team of the GID, principal investigator was Dr.M.-Th.Rolland, Bonn. The directory comprises data on 462 thesauri, all of them were collected on the basis of the original documents. The thesaurus analysis was carried out using a specially devised questionnaire in English, French and German. The entries were standardized and the subject headings were translated for the trilingual index. The data were automatically input and edited using FIDAS. The guide comprises the following sections: Thesaurus descriptions, index of organizations, index of persons, subject indexes, alphabetically arranged for each language, de, en, fr. In addition to thesauri, including also subject heading lists, 192 references were included which contain information on current thesauri not yet available, and planned and discontinued thesaurus projects, unstructured lists of keywords, and out-of-date thesauri. The arrangement is by ten main groups of disciplines with a total of 51 sub-groups. Within the latter the thesauri are arranged according to subject similarity. The description gives data in the following 12 fields: Responsible organization, originator, language, availability, fields covered, terms, display, subdivision, relational structure, notation, construction and maintenance, implementation. The thesauri collected have been integrated into the existing library of the GID Informationszentrum. In addition to the printed volume, a data base is being prepared, accessible via ECHO (Europ.Comm.Host Organization), Customer Service, 177, route d'Esch, L-1471 Luxembourg.

Janssen, J. (Ed.), Marchotorchino, F. Proth, J. (Ass.Eds.): Ap-
plied stochastic methods and data analysis. Orig. en. Vol 1,
No 1, Chichester, GB, New York, US: J.Wiley & Sons 1985. 78 p.,
(4x/ann.)

This new journal is meant to serve as an interface between the
theoretical aspects of applied probability and data analysis
and their applications to the real world and, to give great
emphasis to the comparison of various methods available and
the elaboration of new types of solutions (Editorial). The
first issue contains 6 articles, two on statistical valida-
tion (L.Guttman, M.Schader & F.Schmid), one on production man-
agement (H.Garcia & J.M.Proth), one on biometrics (P.Parisot)
one on economics (F.Abikhalil et al), and one on reliability
(S.Yamada & S.Osaki). In further issues, Letters to the Edi-
tor, Book Reviews, and Announcements are to be included also.

07 Textbooks

86-079 07.1
Soergel, D.: Organizing information. Principles of data base and retrieval systems. Orig. en. Orlando, New York, etc.: Academic Press 1985. XI, 450p., 255 refs.
The textbook is divided into the following five parts comprising altogether 18 chapters: 1) The systems approach to information transfer, 2) Objectives of ISAR (Information and Retrieval Systems), 3) Data schemas and data structures, 4) Index language functions and structure, 5) ISAR systems operation and design. The extensive bibliography (255 refs.) is subdivided according to the chapters and sections. There is an author and a subject index.

86-080 07.23
Lancaster, L.W.: Thesaurus construction and use. A condensed course. Orig. en. Paris, FR: Unesco 1985. 89p., PGI-85/WS/11
English version of the course published in 1981 by the Centro Argentino de Informacion Cientifica y Tecnologica (CAICYT).

86-081 07.23
Wersig, G.: Thesaurus-Leitfaden. Eine Einführung in das Thesaurus-Prinzip in Theorie und Praxis. (Thesaurus guide. An introduction into the thesaurus principles in theory and practice, 2nd enlarged ed.) 2.erg.Aufl.unter Mitarbeit von Petra Schuck-Wersig. Orig.de. München, etc.: K.G.Saur Verl. 1985. 394p., 244+116 refs., DGD-Schriftenr.Bd.8, ISBN 3-598-21252-6
The first edition was published in 1978 (book review see Int.Classif.7(1980)No.2, p.90-91, by D.Soergel). The 2nd ed. contains a Part II entitled "Thesaurus situation" (p.347-394). It presents a survey on the developments and experiences since 1978 and includes hints about computer assistance in thesaurus compilation and maintenance. Concludingly a "Look into the future" is given..

Korwitz, U.: Zur Geschichte der fachlichen Literaturerschließung. Die medizinischen Referateblätter des J.Springer Verla-ges. (On the history of literature analysis. The medical abstract journals of the J.Springer Publishing House) Orig. de. München, etc.: K.G.Saur Verl. 1985. XI,204p., 23 tables, 44 figs., 93 refs. ISBN 3-598-10580-0

Today it is usually not known how much scientists and librarians before the 2nd World War depended on the various "Zentralblätter" and "Berichte" published in Gennan to supplement the medical literature available in indexes such as the Index Medicus (existing since 1879). The book tries to trace the development of abstract journals of the J.Springer House from its beginning until today and to analyze it. In an exemplifying manner the development of one abstract journal and one annual report is shown in detail. No index.

It is possible to measure the stage of development of a country by a well-defined set of variables. Since such a set is composed of nominal-, ordinal- and interval-/ratio-scales variables and in consideration of the vagueness and imperfection of the published data, the interval- and ratio-scaled variables are transformed into ordinal scaled variables. The new method of cluster-analysis used can work with mixed data. The report is in two parts. The first one is concerned with statistical methods and their implications used for the classification of the countries. The second one concerns a cluster-analysis of 112 countries regarded in their stage of development by economic variables. Later additions to the volume are foreseen for cluster-analysis of the demographic, the political sphere and the sphere of basic needs and social factors.

3 CLASSING AND INDEXING

31 Theory of Classing and Indexing

86-176 311; 193
Batty, D.: Reflections on active and passive voices in indexing. J.of Libr.& Inform.Sci., USA/Taiwan 10(1984)No 1, p.13-21, 9 refs.

Examination of index languages of the last 100 years confirms that nearly all are based on an entity/activity combination. This is based on the use of phrases that reflect the passive rather than the active voice in natural language. Linguistic studies reveal a difference in the way the mind processes active and passive sentences and lends theoretical support to many pragmatic solutions to indexing problems. (Orig.abstr.)

Blair, D.C.: Indeterminacy in the subject access to documents. Orig.en. Inform.Process.& Management 22(1986)No 2, p.229-241, 16 refs.

Subject access to documents is influenced by two kinds of indeterminacy: the one of the indexer's selection of indexing descriptors and the one of the inquirer's selection of search terms. The possibility of successful retrieval depends on how these two indeterminacies interact. Five types of interaction are discussed and a change in the traditional method of subject searching is suggested as a way of reducing the effect of one of these two indeterminacies and of avoiding those types of interactions where the retrieval of the desired document(s) is impossible.

4 ON UNIVERSAL SYSTEMS

41 On Universal CS & T in General

86-226 415
Fuller, V.: 4M Classification: A new taxonomy of knowledge. Orig.en. Berkeley, CA: Lorentz Report Production 1985. IX, 307p.
Starting on the idea that knowledge can theoretically be organized into Matter and Movement it was assumed that the addition of measurements offers a way of classifying knowledge. Thus the 4Ms stand for Matter Measurement(s), Movement(s) Measurement(s). A database of words assumed to represent the knowledge in an anatomy and physiology text was grouped into these four classes. Further work is outlined being directed toward such a kind of classification in the hard (physics) and in the so-called soft sciences.

86-234 43.05
DC&. Decimal Classification. Additions, Notes, and Decisions 4 (1985)No.5. Orig.en. Albany, NY: Forest Press 1985. 87p.
In the News Section the change of administration at Forest Press is mentioned (Mr.P.J.Paulson started June 1, 1985, Mr. J.A.Humphrey retired, Mr.R.B.Sealock, earlier Director until 1977, died in Nov.1984). There are also reports on Revisions of Ed.19; the Arabic Edition; DDC for School Libraries: OCLC-CLR-FP Research Project; Workshops; Applications of DDC Numbers to 123439 titles; Exhibits and Conferences, etc. In this issue - next to a number of corrections, changes and new numbers - revisions are published on 312 Statistics and the Area Tables Expansions for Japan and South Africa, together with an alphabetical index. The Annual Report of the DDC Editorial Policy Committee by M.E.Cockshutt is included, too, as well as a number of letters and responses from the Division.

This paper was presented at the 51st IFLA General Conference, Chicago, Aug.1985. It is a report on a research project in which the Relative Index and Schedules of the DDC have been integrated into the subject searching features of an experimental online catalogue. Evaluation was done by library patrons and staff in four libraries: The Social Science Reading Room of the Library of Congress, the New York State Library, the Public Library of Columbus and Franklin County (Ohio), and the Mathematics Library of the University of Illinois at Urgan-Champaign.

86-242 43.753
Markey, K.; Demeyer, A. et al.: Dewey Decimal Classification Online Project: Evaluation of a library schedule and index integrated into the subject searching capabilities of an online catalog. Orig.en. Dublin, OH: OCLC Online Computer Library Center. Off.of Res. 1986. XLIII, 382p., 17 app., 72 fig., 62 refs.
The objectives of the project were: 1) To use the consensus of DDC experts to determine strategies for searching and displaying the DDC in an experimental online catalog. 2) Demonstrate the DDC as a searcher's tool for subject access, browsing, and display in the experimental online catalog. 3) Test the effectiveness of the DDC as a searcher's tool in this catalog. 4) Evaluate the demonstration and test results. The comprehensive report covers the following 9 chapters: Project objec-

tives and research questions. Literature review. Strategies for searching and displaying the DOC in an online catalog. Machine-readable data for the development of the experimental online catalog. Subject searching in the experimental online catalog. Methods used to conduct the online retrieval tests. Time spent searching, estimated recall, and matched output in online retrieval tests. Failure analysis of subject searching options. Integrating the DOC into online catalogs and cataloging systems.

The author started research by sending questionnaires to North American Libraries known already to have, or to be in the process of developing online catalogues, to collect data on the degree of use made of classification systems and to identify reasons for its inclusion or exclusion in connection with these tools. The analysis of the data is still in progress.

LDV-Forum Vol 3, No 2, 1985. p.61-66, 11 refs.
In principle the use of experts system approaches in IR must be welcomed. In practice, however, success seems to be hampered as many of the postulated components are presently unavailable and their construction or development appears to be very difficult and none of the postulated components has been evaluated and their effectiveness must be taken on faith at the present time.

Studwell, W.E.: Why not an "AACR" for subject headings? *Catalog.& Classif.Quarterly* Vol 6, No 1, 1985. p.3-9, 25 refs. The essay explains the need for a code, provides historical background, and presents some broad proposals as to the philosophy, structure, and form of the code and what the code should cover. Included is the relation between the proposed codes and the Library of Congress' 1984 Subject Cataloging Manual.
